

Marvelous Animals September 25, 2019

Wednesday, September 25, 2019

Learning about nature and animals is always fun! We are traveling to the **Navarino Nature Center** to do just that! The theme of the day is Marvelous Mammals. Have you ever wondered what a bear skin feels like? Or feel a badger's claw? Our **included** program will allow us to touch and feel different skins, bones and skulls from different mammals that live in Wisconsin. To keep the theme going, we will be making a craft that we can take home with us to remind us of this great day. We will take a break for our **included lunch** which we will

have here at the nature center so we can enjoy the natural beauty. After lunch it is time for some bird talk. We will learn about the different kinds of birds that live in this area. And then it is time to put it all together. Hop on board the trolley as we take a relaxing ride through the

Navarino Wildlife Area. How many animals and birds do you think you will see? It has been a fun day spending it in nature. We will depart the Nature Center mid-afternoon and as we make our way back home we will make a little detour in Wittenberg to see the amazing murals they have painted on the sides of many of their buildings. You will be pleasantly surprised at the fantastic paintings they have! We arrive back in Wausau in time for our **included dinner**.

Activity Level: Low

Tour Includes:

All Attractions

All Meals
